INTRODUCTION	1
OBJECTIVE	1
SUMMARY	1
OUTCOME	1
CONCLUSION	2

INTRODUCTION

Performing a role play on the concept of Professional issues/ethics and etiquettes.

Ethics are principles followed depending upon the moral responsibility that a person feels. The study of related questions about moral ideals, character, policies and relationships of people and organizations involved in technological activity, can be termed as Engineering Ethics.

Engineering is a process of developing an efficient mechanism that easier and quickens the work using limited resources and while adopting/learning these ethics and professional etiquette play the most important role, however ethics are principles accepted by society, which also equate to the moral standards of human beings. An engineer with social ethics can help society in a better way.

OBJECTIVE

By performing this activity, we shall be able to:

- To present the professional situation in an effective, convincing, and timebound manner.
- To learn how to describe our opinions and process of thinking in front of team members convincingly and effectively.
- To learn the significance of morality.
- To learn how to put forth opinions and views regarding a particular situation in order with considering professional ethics.

SUMMARY

As described in the introduction, in this activity we were supposed to perform a welldefined and well-structured role play given that, a professional situation where an engineer must go through any unethical or unfair situation, so how should we react in such incidents, what is morally correct or incorrect, what should our plan of action, etc.

This activity was performed in a group with other classmates to create a skit and perform it in front of the class. However, the steps/ procedure we followed are as described:

PURPOSE

1. Choose any one professional scenario to perform.

Chose following case scenario for role play.

“An engineer who develops a proto-type for the project, loses it due to a mishap exactly the day before the submission. Is it morally correct to outsource the prototype of the project and reduce the risks of job insecurity? What should he do?”

2. To study all aspects of professional morality regarding the chosen scenario
3. To prepare a well-structured skit for presentation
4. After presenting in front of the class, describe all possible conclusions convincingly.

OUTCOME

After performing this activity, we are able:

- To figure out our own immoral behavior in public spaces or academic environment.
- To learn to distinguish appropriate moral values to implement in daily traits.
- To able to express individuals’ opinions firmly.

CONCLUSION

Hence, we successfully performed a role-play describing the importance of morality and can be concluded as follows:

The scenario presented under activity by group members created a professional environment in which everyone has to think upon ethically as well as morally valid cases, and on a similar basis we concluded with an opinion, being a professional one should understand and follow some moral values that will help everyone to deal with such uncertain situation to maintain right track we are following in life to get successful.
